

**THE HUMAN PERFORMANCE AND REHABILITATION CENTER  
COLUMBIA, SOUTH CAROLINA**

February 13, 1998

To Whom It May Concern:

Our clinic has worked with Mobile Imaging and Scanning Solutions, Inc. for nearly one year transferring patient charts to CD-ROM. The M I S. staff has made this transition a pleasant one. The records are removed from our office by M I S. and CD's delivered to us in a timely manner. The quality of the work is excellent. The records are easily accessed and all pages are legible and make excellent hard copies, if needed. If a question arises regarding the work being done, M I S. will call and ask to be sure that the work is done correctly.

Transferring our records to CD-ROM has been a real benefit to our practice. We now have additional space where boxes of charts once were, and we have our records available at a few keystrokes. I recommend the services of M I S. for any business that is looking for a more efficient, cost-effective method of managing paper records.

Sincerely,

*Marcia Shue*
