TO PROSPECTIVE CUSTOMERS OF MIS:

MIS upgraded our computer system from Word Perfect to Networking, Windows and Word. It was a big leap for us but MIS did a great job of putting together a proposal that suited our needs. It also oversaw the process beginning with our cabling and electrical needs to the actual installation, including technical support to download our Word Perfect files to Windows and Word.

Although it was a sometimes frustrating transition, MIS was always quick to attempt to remedy any problems that developed. Its principals were always considerate and responsive to our frustrations and problems adjusting to this new world of networking, Windows and Word. It is a company that we found stands behind its service and responds quickly when problems inevitably arise.
