Mobile Imaging

March 6, 2007

Subject: Reference Letter by Oiles America Corporation regarding the services provided by Mobile Imaging

To Whom It May Concern:

Oiles America Corporation is the North American subsidiary of Oiles Corporation of Japan, an internationally recognized leader in maintenance free bearing products. Oiles America Corporation is a major supplier of bearing products to the auto industry, both as a first tier supplier and in support of other first tier manufacturers.

We utilized the services of Mobile Imaging for a project that required converting our paper drawings into an electronic format and indexing them. As most of our drawings are confidential it was essential for us that any company doing the scanning must do so at our facility. Mobile Imaging's ability to set up the equipment and start work in no time was astounding. Also, the professional training and support provided throughout and after the project was impeccable.

In closing, if anyone is looking for an affordable scanning and indexing services with a professional approach we strongly recommend Mobile Imaging.

Sincerely,

A handwritten signature in cursive script that reads "Hamza Mujeeb".

Hamza Mujeeb
Project Engineer – Oiles America Corp.
